

regardless of their race or ethnic origin. We will continue to champion and improve programs that break down barriers to adoption through aggressive recruitment of families, financial aid to support placements, and technical assistance to agencies committed to special needs adoption.

As we observe National Adoption Month, we celebrate these achievements and recognize the rewards of adoption, but we must also remember that much work remains to be done. Citizens from all communities and organizations from the public and private sectors must join together to renew our commitment to finding permanent homes for each one of America's children.

Now, Therefore, I, William J. Clinton, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim November 1995, as National Adoption Month. I urge the people of the United States to observe this month with appropriate activities and programs and to participate in efforts to find permanent homes for waiting children.

In Witness Whereof, I have hereunto set my hand this first day of November, in the year of our Lord nineteen hundred and ninety-five, and of the Independence of the United States of America the two hundred and twentieth.

William J. Clinton

Statement on Signing Biotechnology Process Patent Legislation

November 1, 1995

I am pleased to sign into law S. 1111, a bill to provide enhanced protection of biotechnology process patents. This bill will update current patent law to provide the protection American biotechnology companies need to continue developing new products. American consumers will benefit from improvements in the diagnosis, cure, or treat-

ment of disease and from the production of healthier, more abundant foods.

Process patents are especially important in biotechnology, since part of the genius of that field is to produce commercial quantities of breakthrough products through new and inventive processes. If the innovative process used to make a biotechnology product is not protected by patent, American biotechnology will remain vulnerable to foreign imitation. This bill will provide necessary new protection for processes, spurring innovation and keeping American jobs in America.

In less than two decades, the biotechnology industry has created more than 100,000 high-wage American jobs and it now generates annual sales of over \$7 billion. Originating in the United States, biotechnology has already produced life-saving drugs that dissolve blood clots in heart attack victims and treat anemia in patients suffering from chronic kidney failure. It has helped produce disease-resistant plants, more nutritious foods, effective waste treatment systems, and methods to clean and protect the environment. American companies working to commercialize breakthrough products should not be required to face unfair competition from overseas.

This bill addresses the need for current patent laws to keep pace with the rapid growth in biotechnology. It was passed with the strong support of this Administration and broad bipartisan support in the Congress. I am pleased to sign S. 1111 into law to ensure the continued development of important products for American consumers and continued U.S. job growth in this field.

William J. Clinton

The White House,
November 1, 1995.

NOTE: S. 1111, approved November 1, was assigned Public Law No. 104-41.

Remarks to the Community Anti-Drug Coalitions of America Forum

November 2, 1995

Thank you, Jim, my good friend Jim Burke. Thank you for devoting your life to this cause. Thank you, Alvah Chapman, CADCA's
